2. CC- Co-curricular course, select any one out of three.
3. VC- Vocational Course, select any one out of three.

B.Com. – Semester I

Major A - P-1: Financial Accounting

Credit: 4

T: 4 Lectures per week

Course Outcomes: The students will be able to:-

- Acquire knowledge of the basic concepts and conventions of accounting.
- Prepare accounts of a partnership firm.
- Prepare accounts of special kinds such as Royalty accounts, Voyage accounts and Branch accounts.
- Prepare accounts of Hire-Purchase & Installment Purchase as well as Insolvency of the business units.
- Gain insight into the Indian accounting standards as well as IFRS.

Unit I: Introduction

Definition, Nature and Scope of Accounting, Concepts and Conventions, Introduction to Financial Statements, Capital and Revenue Items, Indian Accounting Standards & IFRS, Basics of Computerized Accounts.

Unit II: Partnership Accounts

Advanced problems, Admission, Retirement and Death of partners, Dissolution of Partnership Firm.

Unit III: Hire-Purchase System& Royalty Accounts

Accounting Records in the Books of Hire Purchaser and Hire Vendor, Different Methods of Calculation of Interest and Cash Price, Maintenance of Suspense Account, Payment of Premium, Default in Payment and Partial Return of Goods.

Installment Accounts – Difference between Hire Purchase and Instalment Payment System, Accounting Records in the Book of Purchaser and Vendor, Interest Suspense Account.

Royalty Accounts – Accounting records for Royalty in the Books of Landlord and Lessee, Recoupment of Short working, Sub-lease, short working Reserve Account.

Unit IV: Special Accounting

Meaning, Circumstances of Insolvency, Procedure of Declaring Insolvency, Preparation of Statement of Affairs and Deficiency Account.

Insurance Claim for Loss of Stock and Loss of Profit, Branch Accounts.

Voyage Accounts – Meaning & Preparation of Voyage Accounts.

P 2 - MICRO ECONOMICS

Credit : 04

T: 4 Lectures per week

Course Outcome : After studying all materials and resources presented in the course, the student will be able to:

- Explain the role of scarcity, specialization, opportunity cost and cost/benefit analysis in economic decision-making.
- Identify the determinants of supply and demand; demonstrate the impact of shifts in both market supply and demand curves on equilibrium price and output.
- Summarize the law of diminishing marginal utility; describe the process of utility maximization.
- Calculate supply and demand elasticities, identify the determinants of price elasticity of demand and supply, and demonstrate the relationship between elasticity and total revenue.
- Describe the production function and the Law of Diminishing Marginal Productivity; calculate and graph short-run and long-run costs of production.
- Relate to real world business scenario through study of various market forms.
- Study the factors affecting distribution of income through an analysis of various factor payments.
- Gain in-depth insight and equip them to analyze the real economic situations more effectively with the help of practical problems using elementary mathematics.

Unit –I

Definition and Concepts of Economics: Wealth, Welfare, Scarcity and Growth Oriented definitions, Concept of Scarcity, Optimum utilization, Equilibrium, and various forms of equilibrium.

Nature and Scope of Economics, Micro and Macro Economics. Inductive and Deductive methods of Economics

Unit –II

Consumer Behaviour and Utility Analysis; Cardinal Approach: Law of Diminishing Marginal Utility, Law of Equi-Marginal Utility, Consumer's equilibrium, and consumer's surplus. Demand Analysis: Types, Determinants and change in demand, Law of Demand, and its exception. Elasticity of Demand: its types and measurements. Ordinal Approach: Indifference curve Analysis, price, income, and substitution effects.

Unit –III

Producer's Behaviour: Production and Factors of Production. Laws of Production: Law of Variable Proportions and Return to Scale. Isoquant: Meaning, Assumptions and Properties. Producer's Equilibrium through Isoquants. Cost Curves Analysis: short run and long run cost. Law of Supply and its Elasticity.

Market: Revenue Analysis, Concept and Classification of Market. Equilibrium and Price Determination of Firm and industry under Perfect competition, Monopolistic competition and Monopoly, Price discrimination in monopoly.

Unit-IV

Distribution: Factor Pricing, Theory of Marginal Productivity. **Rent:** Ricardian Theory, Modern Theory, Quasi Rent. **Wages:** Subsistence Theory of Wages, Wage Fund Theory, Residual Claimant Theory and Marginal Productivity Theory. **Interest:** Gross and Net Interest, Classical Theory of Interest, Loanable Funds Theory, Liquidity Preference Theory. **Profit:** Accounting and Economic Profit. Dynamic Theory of Profit: Risk-bearing Theory, Uncertainty Bearing Theory, and Innovation Theory.

Major B - P-1: Business Organisation

Credit: 4

T: 4 Lectures per week

Course Outcomes: The students will be able to:

- Understand basics about a business organization and its various forms.
- Understand the social responsibility of business towards the various stakeholders.
- Gain knowledge of the new forms of business operations and organisations i.e., E-Commerce, LLP, OPC.
- Get knowledge about computation and fixation of remuneration of labour and incentive plans.
- Gain insight of stock exchanges and commodity exchanges and their working as well as regulation.
- Understand organisational process and different types of organisation structure.

Unit-I: Introduction

Nature and scope of business, Social Responsibility of Business, Size of a business unit, Business Environment, Government and Business.

Unit-II: Forms of Business Organisation

Forms of business organisations and comparative study - Sole Proprietorship, Partnership, Joint stock company, Co-operative organisation, Limited Liability Partnership, One Person company, E-Commerce.

Unit –III: Combinations and Markets

Business combination and its types, Rationalisation and Automation, Methods of Remunerating Labour, Stock Market, Commodity Market,

Unit-IV: Organisation

Organization process – Importance, Principles, Types of Organization Structure, Centralisation and Decentralisation, Committees, Departmentation, Delegation of authority.

Minor - Q1: Currency Banking and Exchange

Credit : 02

T: 2 Lectures per week

Course Outcome : After studying all materials and resources presented in the course, the student will be able to:

- Have a sound theoretical base in various areas of banking and exchange.
- Understand the channel for flow of money in the economy.
- Analyse the role and importance of credit in the economy.
- Get insight knowledge about exchange rate and exchange control.

Unit –I

Functions, Significance & Various Forms of Money, E- Money. Quantity Theory of money (Fisher's): Assumptions and Criticism, Monetary Standard – Gold Standard, Bi-metalism and Managed Currency Standard. Principles & Methods of Note issues, Indian Money Market.

Unit –II

Meaning and Significance of credit, Factors Influencing the Volume of Credit in the Country, Credit Creation by Bank, Credit Control by RBI. Inflation: Causes & Remedies.

Unit –III

Types of Banks, Central Bank and Commercial Banks: Meaning and Functions, Regional Rural Banks. E- Banking & Postal Banking,

Unit –IV

Concept of Foreign Exchange and Exchange Rate, Factors Causing Fluctuations in Exchange Rate, Exchange Control: Meaning, Objective and Methods.

CC1- Manpower Economics

Credit : 02

T: 2 Lectures per week

Course Objective: The objective of this paper is to equip students with a comprehensive understanding of the key principles and practices in Human Capital Management and Labour Economics.

Course Outcome:

- Provide an in-depth knowledge of manpower planning and human resource forecasting, enabling students to understand and apply various statistical and mathematical models in real-world scenarios.
- Analyse labour market dynamics, including the concepts of labour supply and demand, market equilibrium, and the factors influencing unemployment and manpower migration.
- Explore the theoretical frameworks and practical approaches to wage determination, emphasizing the relationship between labour productivity and wages.
- Examine the role of labour unions, industrial relations, and the state in managing manpower, ensuring social security, and implementing labour welfare measures.
- Foster critical thinking on important labour legislations in India, their implications for the workforce, and the broader aspects of human capital formation and labour market discrimination.

Unit 1: Labour Market Dynamics

Meaning and concept of manpower economics. Demand and Supply of Labour; The Short- and Long-run Labour Supply and Labour Demand Curves and their Elasticities; Labour Market

Equilibrium. Unemployment: Meaning and Definition; Measures of Unemployment in India; Types of Unemployment; Causes of Unemployment; Rural Unemployment. Manpower Migration. Human Development Index.

Unit 2: Manpower Planning and Forecasting

Manpower Planning: Objectives (Micro and Macro Levels) – Benefits, Advantages, Limitations and Problems. HR Forecasting: Process, Determining HR Demand, Ascertaining HR Supply. Statistical and Mathematical Models in Manpower Planning - Cohort Analysis, Census Analysis, Markov Models. National (Macro Level) Manpower Planning: Various Approaches. Recent Trends in HR Planning.

Unit 3: Wage Concepts and Determination

Concepts of wages - fair, living- minimum wages. Classical, Neo classical and bargaining theories of wage determination; Keynesian theory of wages. Principles of Wage Determination Process; Principles of Wage and Salary Administration; Labour Productivity and Wage Relationships. Wage determination by sectors - Urban and Rural Organised and Unorganised sectors.

Unit 4: Labour Relations and State's Role

Labour Unions; introduction; Growth of Trade Unionism in India; Problems of Trade Unions, Advantages, and problems of Trade Unions in India. Industrial Disputes and Settlement Techniques; Industrial Relations. Role of state in managing manpower; Social security and labour welfare measures. Important Labour legislations in India and their implications. Economics of Education and Human Capital Formation. ILO; Labour Market Discrimination.

Recommended Books

- Human Resource Management by Gary Dessler; Pearson Publications
- Labor Economics by Pierre Cahuc and André Zylberberg; Prentice Hall India Publications
- Labor Economics by S. Chakraborty, Himalaya Publishing House

B.Com. – Semester II

Major A - P-3: Business Regulatory Framework

Credit:04

T: 4 Lectures per week

Course Outcome: The students will be able to: -

- Understand the nature and meaning of contracts, forms of contracts and essentials of a valid contract.
- Gain insight into various kinds of contract.
- Gain in-depth knowledge of Sales of Goods Act and Negotiable Instruments Act
- Have knowledge of the fundamentals of Consumer Protection Act.
- Keep updated about the amendments in these laws and regulations.

Unit 1—Indian Contract Act 1872 - Definition - Kinds of Contracts - Valid – Void - Voidable -Essentials of a Valid Contract - Offer and Acceptance - Communication of Offer - Acceptance and its Revocation - Agreement - Consideration - Capacity to Contract - Free Consent - Legality of Object and Consideration – Agreements expressly declared Void - Performance of Contract -Discharge of Contract-Breach of Contract-Remedies for Breach of Contract, Quasi Contract.

Unit II – Contract of Indemnity and Guarantee- Meaning and Definition of Guarantee, Kinds of Guarantee - Rights and Liabilities of Surety - Discharge of Surety. Bailment and Pledge- Essentials of a valid Bailment, Types of Bailments, Rights and Duties of Bailor and Bailee - Finder of Lost Goods-Pledge-Essentials-Rights and Duties.

Unit III--Law of Agency - Essentials, kinds of agents, rights and duties of agent and principal, creation of agency, termination of agency-sub agents and substituted agents. Sale of Goods Act,1930 -Essentials of Contract of Sale Goods - Classification of Goods - Conditions and Warranties -Transfer of Property in Goods - Rights of Unpaid Seller - Buyer’s Right Against Seller - Auction Sale.

Unit IV—Negotiable Instrument Act 188: Definition of negotiable instruments; Features; Promissory note; Bill of exchange & cheque; Holder and holder in the due course; Crossing of cheque, types of crossing; Negotiation; Dishonours and discharge of negotiable instrument. Consumer Protection Act 2019: Salient Provisions.

P 14 - STATISTICAL METHODS

Credit : 04

T: 4 Lectures per week

Course Outcome :

- The course content of this paper has been designed with the assumption that students have no knowledge or rudimentary knowledge of Business Statistics.
- The purpose is to enhance student's understanding of the fundamentals of statistics.
- In this paper the students will be imparted the knowledge about the measures of descriptive as well analytical statistics and their application in different fields. These

fields may include business, trade, industry, macroeconomic indicators, social phenomenon, day to day activities etc.

- Through the study of this paper, students will become acquainted with specific skills of data collection, processing, presentation and application of statistical tools on these data. This is how they will know the characteristics of data and learn analysis, interpretation and prediction of unknown data.

Notes:

Use of Simple/Scientific calculator is allowed.

Unit –I

Introduction: The Nature and scope of statistics, Definition of statistics. Law of Statistical Regularity: Law of Inertia of Large Numbers. Census and Sampling, Methods of Sampling, Types and Characteristics of Statistical Unit. Methods and instruments of data collection.

Unit –II

Classification and Tabulation – Objects, general rules for the construction of tables.

Measures of Central Tendency: Mean – Simple and Weighted, Mode, Harmonic and Geometric Mean; Positional Averages- Median, Quartile and Percentiles.

Unit –III

Measures of Dispersion, Skewness and Kurtosis – Range, Quartile Deviation, Mean Deviation, Standard Deviation and their coefficients; Measures of Skewness and Kurtosis. Correlation Analysis – Scatter diagram, Karl Pearson's coefficient of correlation, Spearman's ranking method.

Unit –IV

Regression Analysis – Linear regression, regression lines, regression equations.

Interpolation – Assumptions, Binomial, Newton's advancing differences, Lagrange's methods.

P 17 - Information Systems and E-Business

Credit : 04

T: 4 Lectures per week

Course Objectives

The course aims to develop basic understanding of the Information Systems and E-commerce, and their role in Business Organizations with a focus on the development and application of various Information Systems using Information Technology.

Course Outcomes

Upon successful completion of this course the students will be able to:

- Develop the functional knowledge of Computer Systems
- Develop the thorough understanding of various Information Systems with particular focus on DSS, MIS, TP, EIS and, CRM Systems
- Understand the basic knowledge of the applications of Database Management Systems and their development
- Understand the concepts of E-Commerce with an application orientation

Unit I: Introduction to Computer systems, elements of a Computer System, types of Computers and their features, input, output and storage devices, types of software, networking and Internet, types of networks and networking devices, methods of Internet access, services available through Internet, business applications and benefits of computerization and Internet.

Unit II: Introduction to Information Systems, business applications and its benefits, functional and cross functional Information Systems, Transaction Processing Systems, Electronic Data Interchange, On Line Analytical Processing, Management Information Systems, Decision Support Systems, Executive Information Systems, Executive Support Systems, Enterprise applications, Supply Chain Management Systems, Customer Relationship Management Systems.

Unit III: Concept of Database and Database Management System, centralised and distributed Database Systems, Planning and designing of Information Systems, System Flow Charts, traditional System Development Life Cycle, modern System Development Methods, Implementing Information Systems as planned organizational change.

Unit IV: Concept of E-commerce, Digital Markets and Digital Goods, advantages and disadvantages of transacting online, types of E-commerce and M-commerce, E-commerce business models, e-payment systems, digital signatures.

P22. Macro Economics

Credit : 04

T: 4 Lectures per week

Course Outcome : Students who complete this course will be able to understand:

- The meaning and components of the National Income Accounts, especially GDP; the concept and working of multipliers;

- The meaning of the business cycle and its phases and to manipulate the basic Aggregate Supply, Aggregate Demand model of the macro economy;
- The meaning of unemployment and inflation data and how that data is collected and computed;
- How fiscal policy operates, its tools, and its advantages and drawbacks;
- How monetary policy operates, its tools, and its advantages and drawbacks.

Unit- I

Concept and scope of Macro-Economics; Macro-economic Paradoxes: wage-employment paradox and paradox of thrift, The Circular flow of Income and expenditure.

The Analysis and Measurement of Economic Activity - National Income Accounting: Concept and Definitions of National Income. Various components of National Income, Methods of Measurement of National Income and Welfare.

Unit – II

Classical Macroeconomic Models – Say’s Law, Quantity Theory of Money, Wage-Price Flexibility and Full employment.

Aggregate Expenditure – Consumption Function: Concepts of propensities of consumption and saving. Absolute Income Hypothesis, Relative Income Hypothesis; Consumption Puzzle and Permanent Consumption Hypothesis. Investment Function: Types, Marginal Efficiency of Capital (MEC) and Marginal Efficiency of Investment (MEI).

Unit –III

The Concept of Multiplier; National Income Determination in an Open Economy IS-LM Analysis - Derivation of IS and LM Functions; Joint determination of National Income and rate of Interest and Shift and IS and LM Curves.

Unit-IV

Theory of Inflation – Meaning, types and measurement, Demand Pull and Cost Push Inflation. The Philips Curve, Effects of Inflation, Anti-Inflation Policies – Monetary and Fiscal Policies.

Business Cycles – concept, types and phases; Keynes, Hawtrey, Hicks Models.

P27. Introduction to Entrepreneurship

Credit : 04

T: 4 Lectures per week

Course Objectives

The course aims to develop the ideas of Entrepreneurship among students and provide them the insights into the management functions needed to set up and successfully run the Business Ventures.

Course Outcomes

Upon successful completion of this course the students will be able to:

- Develop the concepts of Entrepreneurship and its practical significance
- Develop the capability to identify business opportunities and work on them
- Learn to develop a Business Plan with sufficient focus on Technology, Human Resource and management of Financial resources
- Learn to source the funds and apply them efficiently

Unit I: Entrepreneurship: Concept and objective. Entrepreneurial Traits and Mindset. Misconceptions and Myths about Entrepreneurship. Motivation for becoming an entrepreneur. Entrepreneurship as a Career Option.

Unit II: Creativity, Innovation and Entrepreneurship. bottlenecks to Creativity, sources of New Ideas, techniques for generating ideas, accessing Business Potential of an Idea, Idea to Opportunity: Opportunity recognition. Types of New Ventures, Tax implications of various forms of Ventures. Intellectual Property Rights (IPR): Patents, Trademarks and Copyrights.

Unit III: Business Plan: Purpose and Contents of a Business Plan.

Marketing Plan: Industry Analysis, Competitor Analysis, Market Segmentation, Target Markets, Market Positioning, Marketing Mix.

Operation and Production Plan: Product Design and Specifications, Types of Production Systems, Location and Layout Decisions, Plant and Technology Choices.

Organisation Plan: Planning HR requirements, Organisational Structure and Systems.

Financial Plan: Budgeting. Preparation of projected Statements, Profit and Loss Accounts / Income Statement and Balance Sheet.

Unit IV: Financing of New Ventures: Stages of Financing, Sources of Finance – Seed Funding, Venture Capital Funding, Bank Funding, Lease Financing. Funding opportunities and Institutional Support in India.

Key Financial Indicators: Break-Even Analysis, Ratio Analysis, Valuation Methods, Sensitivity analysis.

P34. Applied Business Statistics

Credit : 04

T: 4 Lectures per week

Course Outcome : On completion of this course, the students will be able to:

1. Describe and discuss the key terminology, concepts tools and techniques used in business statistical analysis;
2. Critically evaluate the underlying assumptions of analysis tools;
3. Understand and critically discuss the issues surrounding sampling and significance; Discuss critically the uses and limitations of statistical analysis;
4. Solve a range of problems using the techniques covered;
5. Conduct basic statistical analysis of data.

Unit-I

Statistical System in India – Indian Statistical Machinery – Organisation at Central and State level, National Sample Survey Organisation – Organisation, Functions, Design and Technique. National Income Statistics: Methods of measuring National Income and related aggregates

Unit - II

Population Statistics – Nature, Importance and Methods of Population Census. Population Census in India. Vital Statistics- Computation of birth, death, Fertility and Reproduction rates.

Unit- III

Analysis of Time Series – Meaning, Importance and Purposes, Components of Time Series Analysis. Long Term Trend and Seasonal Variation measurement – Different methods. Statistical Quality control: Concept, Utility and Techniques. Construction of control charts for Variables and Attributes

Unit- IV

Index numbers and their uses: Definition, Importance and Limitations. Price, Quantity and value index numbers, Methods of constructing index numbers, Tests of reversibility, WPI and CPI, Deflating Index Numbers. Business Forecasting: Concept and Methods

P42. Research Methodology

Credit : 04

T: 4 Lectures per week

Course Outcome: The students will be able to:-

- Understand Research and identify research problems.
- Learn Quantitative and Qualitative Methods of research.
- Represent data in tabular as well as graphical manner.
- Write Research paper and Preparation of Report

Unit I: Introduction, Nature, Scope and Significance of Business Research Methodology, Methods of Research, Research Process, Research Design.

Unit II: Research Problem : Selection and formulation of research Problems.

Unit III: Sampling Design, Data Collection, Tabulation, Different Sources of Primary and Secondary sources of Data Collection.

Unit IV: Analysis of Data, Statistics tools of data analysis, Interpretation of Data and Preparation of Report, Writing, Presentation, Footnotes, References, Bibliography, Appendices.

BCom Semester VIII

P43. Major Research Project (24 Credits)

BCom Semester VII

Specialisation in Applied Economics

P37. ADVANCED MICROECONOMIC ANALYSIS

Credit : 04

T: 4 Lectures per week

Course Outcome:

- To understand the core concepts of demand, cost and production within the broad neo-classical and behavioral economics framework.
- To get familiarized with basic mathematical tools related to the core concepts.
- To be able to comprehend the interaction of the forces of demand and supply for the determination of equilibrium price and quantity.
- To understand the links between consumer behaviour, producer behaviour and the application of economic models to real life situation.
- Understand the applied aspect of production costs and the economic models. Apply economic reasoning to individual and firm behaviour.
- To understand the practical aspects of market and their applicability to real business world.
- Finally, to get familiarized with economic aspects of the affairs of an economy on daily basis.

UNIT –I

Consumer Behaviour- Measurement of Utility: Cardinal vs Ordinal Approaches, Direct and Indirect Utility Function. Indifference Curve Analysis: Decomposition of price effect (Slutsky Approach); Compensated and Uncompensated Demand Function. Applications of Indifference Curve: Consumer Surplus, Rationing, Tax. Theory of Revealed Preference: Strong and Weak Ordering and Theory of Demand.

UNIT –II

Concept of Demand Function and Measurement of Point Elasticity of Demand and Supply. Demand Forecasting – Purpose, Methods and Demand for New Products, Criteria of Good Forecasting Method. Consumer Choice under Risk and Uncertainty: The Neumann – Morgenstern Method.

UNIT –III

Theory of Production: Homogeneous Production Function, Elasticity of Input Substitution and Technological Progress, Cobb-Douglas, CES. Cost Function: Traditional and Modern Theory of Cost and Saucer shaped cost curves; Concept of Cost Function and its Measurement.

UNIT - IV

Market and Pricing: Monopoly: Degree of Monopoly Power, Bilateral Monopoly, Price Discrimination in Monopoly. Oligopoly: Non-Collusive Oligopoly- Models of Cournot, Chamberlin and Sweezy; Collusive Oligopoly: Cartel and Price Leadership Models-Low cost. Introduction to General Equilibrium Analysis – Pareto Optimality.

P38. MANAGING PERSONAL FINANCE

Credit : 04

T: 4 Lectures per week

Course Outcome:

- Help analyse the process of making personal finance decisions, making strategies for listing and achieving personal finance goals.
- Help understand the concept of consumer credit, its importance and use in managing personal finance.
- Help understand the management of risk involved in personal life and its management.
- Help understand various investment options so that earnings and savings can be smartly managed.
- Taking care of personal assets and liabilities to live a healthy financial life.

UNIT –I

Basics of Personal Finance: meaning, definition, need, importance; understanding the effect of time & compounding on value of Money and Wealth Creation; Approaches to Personal Financial Planning; Understanding the financial planning process of an individual; Financial decision based on life stages of a person; Factors affecting personal financial planning - macro and micro factor; Preparation of personal financial statements & Personal Budget; Personal Tax management; Principles for Wealth Building; Personal Financial management & Career planning; Professional and Ethical consideration in Personal Financial Planning

UNIT –II

Personal Credit Management: Understanding Risk in managing credit, Types of financial risks involved in personal financial planning, Importance of Risk returns trade-off in

personal finance management, Consumer credit- meaning, importance, Uses of credit, advantages & disadvantages of credit; Types of credit – open ended and close ended credit; Sources of consumer credit; choosing a source of credit; Consumer complains & consumer protection.

UNIT –III

Insuring against Risk to Personal Resources: Need for insuring personal resources, importance of insuring personal resources, its advantages & disadvantages; Insuring Life: meaning, purpose of life insurance, need for insuring life, types of policies offered. Insuring Property – meaning, need, types of property insurance, types of property losses, Home insurance, Renter’s insurance. Vehicle insurance – meaning, need, types, coverage of vehicle insurance, vehicle insurance cost; Health insurance- meaning, need, cost of health insurance, types of coverage.

UNIT –IV

Investment of Financial Resources: Personal investment plan, Factors affecting choice of investment, Sources of investment information for personal finance, Exploring Investment Alternatives for personal finance: Categorisation of investment alternatives, Investing personal savings in marketable securities, Investing personal savings in bank deposits, Investing in Postal Deposits ; Investing in Real Estate; Investment in Collectibles. **Planning for Safe Financial Future after Retirement:** reasons for retirement planning, planning for retirement income, early retirement plan; Estate Planning: meaning of estate planning, need for estate planning, Wills: meaning of will, preparation of Will, Types of Will.

P39. DEMOGRAPHY AND POPULATION STUDIES

Credit : 04

T: 4 Lectures per week

Course Outcome:

- To understand the basics of demography and demographic techniques.
- To be able to understand demographic events and their role in socio-economic development of a Nation.
- To use these techniques to analyse and plan future course of demographic events.
- To comprehend complex demographic issues and dilemmas faced by developing countries and also be in a position to critically analyse the policy framework to tackle these.
- To understand and deliberate on global demographic experiences and the lessons derived thereof.
- Identify appropriate sources of data, perform basic demographic analyses using various techniques and ensure their comparability across populations.

UNIT – 1

Meaning and Scope of Demography, Relationship with other Sciences. Techniques of Demographic Analysis - Marriage and Marital Dissolution; Measures of Fertility and Reproduction; Factors affecting Fertility; Measures of Mortality; Factors affecting mortality; Life Table - Construction and its Uses; Methods of Population Projection.

UNIT – II

Migration - Concept, Definition, Source of Data and Causes, Internal and International Migration. Urbanisation and Urban Growth– Concept, Definition, Source of Data and Causes. Relationship between Urbanisation and Migration – Theories of Lewis, Fei-Ranis, and Harris-Todaro.

UNIT - III

Theories of Population: Biological Theories – Malthusian and Neo-Malthusian Theory, Spencer, Doubleday and Pearl and Reeds; Socio - Cultural Theories – Socialist Views, Karl Marx and Dumont; Economic Theories - Theory of Optimum Population, and Liebenstein's theory.

UNIT- IV

Population and Economic Development - Theory of Demographic Transition (Theories of Thomposon & Notestein, C P Blacker, Karl Sax, Cowgill and Modern Theory); Concept of human development. Population Pyramid – Concept and Types.

Population Trends in different Regions of the World with special reference to Developing countries. Population in India- Size, Growth and Composition; Census in India. Factors affecting Fertility, Mortality and Migration in India; Population Policy in India; Family Planning Programme of India and its Achievements.

P42 RESEARCH METHODOLOGY

Credit : 04

T: 4 Lectures per week

Course Outcome:

- To enhance the abilities of learners to undertake research in business & social sciences
- To enable the learners to understand, develop and apply the fundamental skills in formulating research problems
- To enable the learners in understanding and developing the most appropriate methodology for their research
- To make the learners familiar with the basic statistical tools and techniques applicable for research

UNIT-I

Concept, Features, Objectives and Significance of Research, Philosophy of Research; Induction and Deduction methods of Research; Types of Research- Pure and Applied Research, Conceptual and Empirical Research, Qualitative and Quantitative Research, Descriptive and Analytical Research, Exploratory Research, Experimental Research, Evaluative Research, Historical Research. Case Study. Research Process.

UNIT -II

Research Problem- Definition and Process of Formulation of Research Problem, Sources of Identifying Research Problem.

Research Design- Meaning and Scope, Research Design for Descriptive, Exploratory and Experimental Research. Case Study.

UNIT -III

Measurement and Scaling- Levels of Measurement-Nominal, Ordinal, Ratio and Interval Scale, Scaling Techniques. Testing of Hypothesis- Procedure of Testing a Hypothesis; Parametric tests: Z-test, t-test, F-tests (ANOVA). Non-parametric tests: Chi-Square test, Mann-Whitney Test and Other Non- Parametric Test.

UNIT- IV

Report writing and presentation- Meaning and Purpose of a Research Report, Types of Report, Format of Report, Essentials of a Good Report, References and Citation Methods: APA (American Psychological Association), CMS (Chicago Manual Style), MLA (Modern Language Association). Footnotes and Bibliography. Modern Practices: Ethical Norms in Research, Plagiarism, Role of Computers in Research.

References:

Text Books :

1. William G. Zikmund -Business Research Methods
2. Kothari C R and Garg Gaurav- Research Methodology
3. Krishnaswami O R-Methodology of Research in Social Sciences
4. Naresh K. Malhotra & Satyabhushan Dash- Marketing Research
5. Anoop Kumar Singh, Statistical Methods (English)
6. Anoop Kumar Singh, Statistical Methods (Hindi)

Suggested Readings :

1. Richard Levin and David S. Rubin, *Statistics for Management*
2. M.R. Spiegel, *Theory and Problems of Statistics*, Schaum's Outlines Series
